Index to volume 6 (1994)

Subject index

A
abstractness–concreteness 191
adult education 373
animated demonstrations 3
authoring documentation 275

C
cognitive modelling 314
cognitive subsystems 61
cognitive walk-through 86
comparative assessment of TA products 289
computer-aided telephony 433
computer-mediated communication 117, 151
computer-supported co-operative work 151, 173
conversational analysis 151
corrective skills development 23

D
design activity 239
direct manipulation 411

E
electronic bulletin boards 117
electronic mail 117
error information 23
evaluation 314

F
Fitts' law 213

G
graphical dialogue notations 411

H
human performance modelling 213
hypertext 275

I
icons 191
interaction techniques 213
interactive voice response system 41
interface design 411
interfaces 41, 191, 347

K
knowledge-base 135
knowledge representation 61

M
media alternatives 135
modalities 347
multimedia 135
multiparty interaction 173

O
older adults 373
organisation 239

P
planning 239
pointing and dragging tasks 213
problem solving 3
prototyping 395

R
relevance directed network 433
representations 347
resource allocation 135

S
software development 395
speech recognition 41

T
task analysis 289
theoretical model 173
training 3
truth maintenance 135
turn-taking 151
tutorial documentation 23

U
usability 86, 275
user interfaces 86, 373

Title index

A conceptualisation of multiparty interaction 173
Comparative analysis of task analysis products 289
Delivering HCI modelling to designers: a framework and case study of cognitive modelling 314
Design and implementation of a user-oriented speech recognition interface: the synergy of technology and human factors 41

Development and validation of icons varying in their abstractness 191
Effect of error information in tutorial documentation 23
Electronic bulletin boards: a case study of computer-mediated communication 117
Foundations of multimodal representations: a taxonomy of representational modalities 347
Interacting cognitive subsystems: a framework for considering the relationships between performance and knowledge representations 61
Interdisciplinary collaboration: a case study of software development for fashion designers 395
Learning to use a spreadsheet by doing and watching 3
Multiple worlds: an approach to multimedia resource management using truth maintenance 135
Organisation of design activities: opportunistic, with hierarchical episodes 239
Prediction of pointing and dragging times in graphical user interfaces 213
Review of graphical notations for specifying direct manipulation interfaces 411
Structure for user-oriented dialogues in computer-aided telephony 433
Studies of turn-taking in computer-mediated communications 151
Task-based method for creating usable hypertext 275
Understanding usability issues addressed by three user-system interface evaluation techniques 86
User interface design for older adults 373

Author index

Alty, J L see Bray, A D
Arnott, J see McKinlay, A
Badre, A N, see Garcia, M
Bernsen, N O, Foundations of multimodal representations: a taxonomy of representational modalities 347
Bowen, C D, see Cuomo, D L
Bray, A D and Alty, J L Multiple worlds: an approach to multimedia resource management using truth maintenance 135
Brownsey, K, Zajicek, M and Hewitt, J Structure for user-oriented dialogues in computer-aided telephony 433
Buckingham Shum, S and Hammond, N Delivering HCI modelling to designers: a framework and case study of cognitive modelling 314
Buxton, W see MacKenzie, I S
Charnock, E, Rada, R, Stichler, S and Weygant, P Task-based method for creating usable hypertext 275
Cuomo, D L and Bowen, C D Understanding usability issues addressed by three user-system interface evaluation techniques 86
Curtis, E see Scaife, M
Garcia, M, Badre, A N and Stasko, J T Development and validation of icons varying in their abstractness 191
Green, A J K Interacting cognitive subsystems: a framework for considering the relationships between performance and knowledge representations 61
Hammond, N see Buckingham Shum, S
Hewitt, J see Brownsey, K
Hill, B see Whitefield, A
Hill, C see Scaife, M
Kerr, M P and Payne, S J Learning to use a spreadsheet by doing and watching 3
Kloosterman, S H Design and implementation of a user-oriented speech recognition interface: the synergy of technology and human factors 41
Lazonder, A W and van der Meij, H Effect of error information in tutorial documentation 23
MacKenzie, I S and Buxton, W

Prediction of pointing and dragging times in graphical user interfaces 213
Masting, O see McKinlay, A
McKinlay, A, Procter, R, Masting, O, Woodburn, R and Arnott, J Studies of turn-taking in computer-mediated communications 151
van der Meij, H see Lazonder, A W
Morris, J M User interface design for older adults 373
Nickerson, R S Electronic bulletin boards: a case study of computer-mediated communication 117
Payne, S J see Kerr, M P
Phillips, C H E Review of graphical notations for specifying direct manipulation interfaces 411
Procter, R see McKinlay, A
Rada, R see Charnock, E
Scaife, M, Curtis, E and Hill, C Interdisciplinary collaboration: a case study of software development for fashion designers 395
Stasko, J T see Garcia, M
Stichler S see Charnock, E
Storrs, G A conceptualisation of multiparty interaction 173
Visser, W Organisation of design activities: opportunistic, with hierarchical episodes 239
Weygant, P see Charnock, E
Whitefield, A and Hill, B Comparative analysis of task analysis products 289
Woodburn, R see McKinlay, A
Zajicek, M see Brownsey, K
